WebSite X5 COMPACT 8

WebSite X5 COMPACT 8

The easiest way to create professional websites in just five easy steps.

WebSite X5 is the outstanding tool that helps turn your website dreams into reality. It's packed with advanced tools to help you create professional websites with all of the eye-catching features you see on the web's very best sites.

Features

Powerful Website Features:

- Web 2.0 ready
- Over 500 pre-defined templates
- Internal image editor
- Create multimedia websites with Video (with support for YouTube™), Sound and Flash™ Animations
- Create stunning Image Galleries and SlideShows
- Create multi-language websites
- Internal FTP engine for easy uploading to the Internet

A website in 5 steps:

The WebSite X5 secret is that it doesn't force you to waste time learning complex software, you just follow 5 steps. Each step has been custom designed to make it easy to get truly professional results with the minimum of fuss. There's no need to pay a website design company when you have WebSite X5. Now you can become a website guru!

1. Choose your Design

With over 500 templates, you'll be spoilt for choice when it comes to deciding on the look of your website. Each template has been professionally designed and is easily customisable to make your website unique, all without the fuss of having to learn to be a graphic designer.

Even power users can benefit from WebSite X5. It's the perfect tool for quickly creating website templates before making using of the built-in image, text effects and HTML editors. WebSite X5 even provides for the creation of an unlimited number of pages and an unlimited number of websites!

2. Layout your Website

WebSite X5 is designed to cope with everything from a single 'hello world' web page, to a complex site filled with hundreds of highly detailed pages. The intelligent website layout features make organising your site simple. Group similar pages into one of four levels, these are then automatically converted into the website menus.

3. Enter your Content

WebSite X5 includes a unique content entry system. The object palette supplies intelligent tools for entering every type of web page content - words, pictures, animations, video, slide shows and much more. The content layout tool divides each page into content zones, onto which you drag and drop your choice of content from the object palette. WebSite X5 lets you create even the most complex of page layouts with just a few clicks.

4. Select your Advanced Features

Once your content is entered you can add the finishing touches to your website. In the Advanced Settings section you can enhance the appearance of the text and menus making it easier for visitors to navigate around your website. WebSite X5 is also fully equipped to attract worldwide visitors with its multi-language welcome pages.

5. Put your site on the Internet

Once you have finished creating your website, the final step is to send it to the Internet. Using any web space, the built-in ftp engine makes it child's play to publish your website. But it doesn't stop there; whenever you want to update your website (for example by adding a news item), WebSite X5 intelligently sends just the updates to the web space.
