A website in 5 steps:

The WebSite X5 secret is that it doesn't force you to waste time learning complex software, you just follow 5 steps. Each step has been custom designed to make it easy to get truly professional results with the minimum of fuss. There's no need to pay a website design company when you have WebSite X5. Now you can become a website guru.

1. Choose your Design
With over 100 templates, you'll be spoilt for choice when it comes to deciding on the look of your website. Each template has been professionally designed and is easily customisable to make your website unique, all without the fuss of having to learn to be a graphic designer.

2. Layout your Website
WebSite X5 is designed to cope with everything from a single 'hello world' web page, to a complex site filled with many highly detailed pages. The intelligent website layout features make organising your site simple.

3. Enter your Content
WebSite X5 includes a unique content entry system. The object palette supplies intelligent tools for entering every type of web page content - words, pictures, animations, video and much more. The content layout tool divides each page into content zones, onto which you drag and drop your choice of content from the object palette. WebSite X5 lets you create even the most complex of page layouts with just a few clicks.

4. Select your Advanced Features
Once your content is entered you can add the finishing touches to your website. In the Advanced Settings section you can enhance the appearance of the menus making it easier for visitors to navigate around your website.

5. Put your site on the Internet
Once you have finished creating your website, the final step is to send it to the Internet. Using any web space, the built-in ftp engine makes it child's play to publish your website.

Support and Material
